## HEAT PUMPS

### PK INVERTER

PK INVERTER series high efficiency air/water reverse-cycle heat pumps, fitted with DC inverter compressors combined with modulating circulating pump and fan.

Managed by a microprocessor controller with superheat control logic, using an electronic thermostatic valve that, based on signals sent by the pressure transducers, manages compressor and fan speed modulation via a PWM signal. Noise levels are reduced by continuous control of fan rotation speed.

#### ADVANTAGES

- > High Efficiency
- > 55 °C for DHW
- > Inverter Compressor and Fan
- > High COP and EER
- > Extremely Low Noise
- > Ecological Gas R410a
- > Range from 6 to 15 Kw
- > Heating, Cooling and DHW

## HEAT PUMPS

### PK INVERTER

The units are fitted with single-phase DC inverter rotary hermetic compressors and variable speed axial-flow airfoil fans. The condenser is a finned coil made from copper tubes and aluminium fins, while the evaporator is braze-welded AISI 316 stainless steel plate.

Description	PK INVERTER			
	06	09	12	15
Height (mm)	719	861	1402	1402
Width (mm)	1134	1229	1258	1258
Depth (mm)	373	368	448	448
Power supply	230 V/1/50 Hz	230 V/1/50 Hz	230 V/1/50 Hz	400 V/3 P+N+T/50 Hz
Noise - Sound pressure*****	44-50 dB(A)	45-53 dB(A)	46-54 dB(A)	46-54 dB(A)
Water connections	1" M	1" M	1" M	1" M
Minimum water volume in the circuit	18 l	25 l	35 l	45 l
Empty weight (kg)	69	87	140	145
Operating weight (kg)	73	92	147	152
